Education

- **Columbia University, B.S. (Anticipated)** — New York, NY
  Major in Computer Science, Minor in Economics. — *August 2018 - May 2022*
  - Cumulative GPA: 3.99/4.00. Tau Beta Pi Honor Society Member since November 2020. Dean's List All Eligible Semesters. CP Davis Scholar, Columbia University Scholars Program.
  - Selected CS Coursework:
    Current: Comp. Aspects of Robotics, Computer Graphics, Algorithm Analysis, Prog. Langs. & Translators.
    Completed: Machine Learning, Natural Language Processing, Artificial Intelligence, Computational Linear Algebra, CS Theory, Intro to Prob & Stats, Advanced Programming in C/C++, Fundamentals of Computer Systems, Data Structures and Algorithms in Java, Discrete Mathematics.

Technical Skills

- **Proficient:** Python, Java, C/C++, HTML/CSS, JavaScript | **Tools:** Google Cloud Platform, Bash, GIT

Experience

- **Research Assistant, Azizi Lab** — Columbia University
  Currently use ML methods implemented in Python to analyze tissue and genomic data. — *February 2020 - Present*
  - Currently working on a project analyzing immune cell dynamics in lymphoblastic leukemias. Previously worked on a project analyzing immune cell lineage vs differential gene expression in Growth v Host Disorder patients' tissues using unsupervised learning methods.
- **Summer Research Intern, Qin Lab** — University of Tennessee at Chattanooga
  Paid Internship through iCompBio REU 2020, an NSF-funded program. — *May 2020 - July 2020*
  - Created several LSTM-based neural net models using TensorFlow for predicting weekly new COVID-19 positive cases in New York, Texas, California, and Florida. Code on personal GitHub page.
  - Analyzed effectiveness of using historical flu data and temperature data for prediction.
- **Teaching Assistant** — Columbia University
  Lab Assistant for ELEN 1201: Introduction to Electrical Engineering. — *Fall 2020, Spring 2021*
  - Grade lab reports and hold virtual lab office hours for 6 hours a week to guide students through lab assignments.
- **Research Assistant, Synthetic Biological Systems Lab** — Columbia University
  Assistant in research on engineering bacterial biosensors for cancer tumor detection. — *October 2018 - August 2019*
  - Completed paid summer internship in the lab through CU's Summer Undergraduate Research Fellowship in 2019.
  - Engineered bacteria that selectively grew and fluoresced in a low pH environment. Developed synthetic bio wet lab skills such as PCR, gel electrophoresis, and cell culturing. Work incorporated into coauthored paper.

Personal Projects (all code available on GitHub)

- **nasapic** (*2020 Spring*) Express.js app that uses Pug.js to render static content and serves NASA's Astronomy Picture of the Day using NASA's APOD API. Deployed at https://tamjazad-nasapic.glitch.me.
- **PenaltyKicks** (*2019 Summer*) Command Line Interface based game completely written in Java. It simulates a penalty kick shootout common in world football/soccer tournaments. Standard single player v. computer.

Leadership & Involvement

- **Media Chair, Club Zamana** — Columbia University
  Largest South Asian cultural club on campus; responsible for all club media. — *2019-2020* School Year
  - Was Organizational Committee Member on E-Board during 2018-2019 School Year.
- **Organizational Committee Member, Columbia Science Review E-Board** — Columbia University
  Club that spreads science literacy and publishes a science-focused magazine. — *2019* Spring Semester
- **Other Extracurriculars:** Indoor & Outdoor Intramural Soccer Participant, Past NY Road Runners Member.
