## EDUCATION

---

- **Columbia University, B.S. (Anticipated)** New York, NY  
Major in Computer Science, Minor in Economics. August 2018 - May 2022
  - Cumulative GPA: 3.97/4.00. Dean's List All Eligible Semesters. CP Davis Scholar, CU Scholars Program.
  - Selected CS Coursework: Computational Linear Algebra, CS Theory, Intro to Prob & Stats, Advanced Programming in C/C++, Data Structures and Algorithms in Java, Discrete Mathematics.

## TECHNICAL SKILLS

---

- **Proficient:** Python, Java, C/C++, HTML/CSS, JavaScript | **Some Experience:** R, Ruby, Mathematica  
**Notable Libraries & Frameworks:** Keras/TensorFlow, Express.js/Node.js | **Tools:** Bash, Unix, GIT, npm

## EXPERIENCE

---

- **Research Assistant, Azizi Lab** Columbia University  
Currently use ML and **Python** to analyze single-cell genomic data. February 2020 - Present
  - Currently working on a GvHD project, analyzing single-cell patient data using methods such as phenograph clustering and tSNE. Extensive data analysis using libraries such as pandas, matplotlib, and numpy.
- **Summer Research Intern, Qin Lab** University of Tennessee at Chattanooga  
Paid Internship through iCompBio REU 2020, an NSF-funded program. May 2020 - July 2020
  - Designed deep learning based COVID-19 prediction models using **Python**.
  - Created several LSTM-based neural net models using TensorFlow for predicting weekly new COVID-19 positive cases in New York, Texas, California, and Florida. Code on personal GitHub page.
  - Analyzed effectiveness of using historical flu data and temperature data for prediction.
- **Research Assistant, Synthetic Biological Systems Lab** Columbia University  
Assistant in research on engineering bacterial biosensors for cancer tumor detection. October 2018 - August 2019
  - Completed paid summer internship in the lab through CU's Summer Undergraduate Research Fellowship in 2019.
  - Engineered bacteria that selectively grew and fluoresced in a low pH environment. Developed synthetic bio wet lab skills such as PCR, gel electrophoresis, and cell culturing. Work incorporated into coauthored paper.
- **Research Assistant, Klug Lab** University of Tennessee at Chattanooga  
Computational Bio and Evolutionary Ecology research during high school. November 2016 - August 2018
  - Used **Mathematica** to computationally analyze mathematical models that model the evolution of parental care in nature. Writing of coauthored research paper in progress.

## PERSONAL PROJECTS (ALL CODE AVAILABLE ON GITHUB)

---

- **nasapic** (2020 Spring) Express.js app that uses Pug.js to render static content and serves NASA's Astronomy Picture of the Day using NASA's APOD API. Deployed at <https://tamjazad-nasapic.glitch.me>.
- **PenaltyKicks** (2019 Summer) Command Line Interface based game completely written in Java. It simulates a penalty kick shootout common in world football/soccer tournaments. Standard single player v. computer.

## LEADERSHIP & INVOLVEMENT

---

- **Media Chair, Club Zamana** Columbia University  
Largest South Asian cultural club on campus; responsible for all club media. 2019-2020 School Year
  - Was Organizational Committee Member on E-Board during 2018-2019 School Year.
- **Organizational Committee Member, Columbia Science Review E-Board** Columbia University  
Club that spreads science literacy and publishes a science-focused magazine. 2019 Spring Semester
- **Other Extracurriculars:** Indoor & Outdoor Intramural Soccer Participant, Past NY Road Runners Member.
